

Job Description

Title: Human Factors Intern

Reports to: Manager

Promotable to: Human Factors Engineer I

Purpose:

The role of a Human Factors Intern is to work collaboratively with team members to plan, execute, and evaluate training research in support of defense, other government, or industry clients. Research topics will include: training systems design, training effectiveness evaluation, adaptive training, human performance assessment using behavioral and physiological means, and other related topics. Additionally, the Human Factors Intern may design objects, facilities, or environments to optimize human well-being and overall system performance, applying theory, principles, and data regarding the relationship between humans and respective technology. HF Interns will also investigate and analyze characteristics of human behavior and performance as it relates to the use of technology.

Duties and Responsibilities:

- Assist in preparing critical reviews of research literature
- Support the execution of research project plans
- Support activities such as user needs analysis, cognitive task analysis and other analyses to identify training needs
- Apply human factors principles and theory to design
- Interface with clients and ensure they receive excellent service
- Support data collection activities
- Conduct statistical analyses using software including SPSS and Excel

Qualifications:

- U.S. Citizen
- Currently pursuing MS/MA or Ph.D. in Human Factors, Cognitive or Experimental Psychology, Applied Psychology, Modeling and Simulation or other relevant area of study.
- Expertise in technology-based training, human performance assessment, game-based training, simulation, adaptive training, mobile learning or instructional design
- Familiarity with military training (preferred)
- Strong written and oral communication skills
- Experience supporting experimental research projects related to human performance, human factors, education, or training
- Experience supporting data collection efforts

- Experience with complex statistical analyses including multiple regression and ANOVA
- Familiarity with Microsoft Word, Excel, PowerPoint, Project, SPSS
- Ability to obtain and maintain a SECRET level clearance

Work Environment:

This position does not require physical activities beyond a typical office environment. It does require computer use, web-based video communications (e.g. Skype, Google Hangouts), and telephone use.

Travel:

The Human Factors Intern will not be required to travel however, there may be opportunities to travel to conduct data collections and other information gathering activities at military, other government, and industry installations. Field work is an integral part of what we do and will be a valuable learning experience for you.

Security Clearance:

All employees must have or be capable of acquiring a Secret DoD security clearance. Guidelines indicating those items that may prevent you from obtaining a security clearance can be found here: <http://www.fas.org/sgp/isoo/guidelines.html>.
